

REMARKS

Applicant thanks Examiner for the courtesy extended by him and his Supervising Examiner during the recent telephonic interview. Preparation of this response has been beneficially informed by the comments made and shared understanding reached during the interview.

Claims 1 and 3-21 were presented for examination and pending in this application. In the latest Office Action, claims 1 and 3-9 were rejected and claims 10-21 were withdrawn from consideration. With this amendment, claims 1, 3, and 9 are amended, claim 8 is canceled, and new claims 22-28 are added. On the basis of the following remarks, consideration of this application and allowance of all pending claims are requested.

Applicant's representative conducted an interview with Examiner Noah Hawk and Supervising Examiner Peter Cuomo on November 14, 2006, the relevant portions of which are summarized herein in accordance with MPEP §713.04. The Office Action and pending claims were discussed. During the interview, Examiners and Applicant's representative reached agreement that the references cited in the latest Office Action do not disclose a "cover plate rotatable around a first axis including a window" and "a drive door for covering the window and rotatable around a second axis parallel to the first axis." Accordingly, these limitations have been added to independent claim 1, thereby placing the claim, and the remaining claims which depend from it, in a condition for allowance.

The Office Action also included a §112(2) rejection and numerous other objections based on various formalities. Applicant has sought to address these concerns through the amendments herein.

Based on the foregoing, the application is in condition for allowance of all claims, and a Notice of Allowance is respectfully requested. If the examiner believes for any reason direct contact would help advance the prosecution of this case to allowance, the examiner is encouraged to telephone the undersigned at the number given below.

Respectfully submitted,
YI-LUNG KUO

Dated: November 14, 2006
